about Profinal

- **founding:** May 2008
- **Managing Partner:** Christian Lovis

„We believe in solar power as one of the most reliable forms of renewable energy and want to enable organizations worldwide to utilize this abundant source to help create a clean energy future.

That’s why we’ve made it our mission to produce and deliver innovative, high quality PV mounting systems & tailored installation support so that organizations worldwide can successfully build their photovoltaic projects and create solar energy, the most abundant renewable energy source available. Always knowing they have a trusted leader on their site.”

Our positive contribution to climate change and your business.

- **major projects and EPC companies**

Planning and installing successful solar parks worldwide requires not only high quality, easy to install and robust mounting systems but also a reliable and trusted partner on your site. We've got your covered for both of this.

From planning, to ground inspections, to offering the most flexible solar solutions for your project and making sure it gets delivered quickly and installed easily – we are here to help.

- **installers**

With our flexible mounting systems we can guarantee you will be home in time for dinner. Save, quick and easy to install. Ultra-lightweight, few components and minimum tool approach. Saving you time and energy.

Save time and energy and get expert advise for your next solar project.

As experienced experts for photovoltaic installations of any size, we know how complex these can be.

products

PV-mounting-structures for...

- groundmounted
- flat roofs
- pitched roofs

competence

- Worldwide producer network
- Demand-oriented solution development
- International orientation

services

- Interdisciplinary network
- Customer-oriented and individual solutionsen
- Short response and reaction times

More network. More synergies. More performance.

Planning, consulting, project management and process optimization in the best hands.
Together we create agile real results.
Europe-wide. Or right next door.

- **Baltic states, Russia** Power Montage
- **Ukraine** Solar Steelconstruction
- **Benelux & France** Elcee Group

- 2. product range**
3. selected reference projects
4. contact

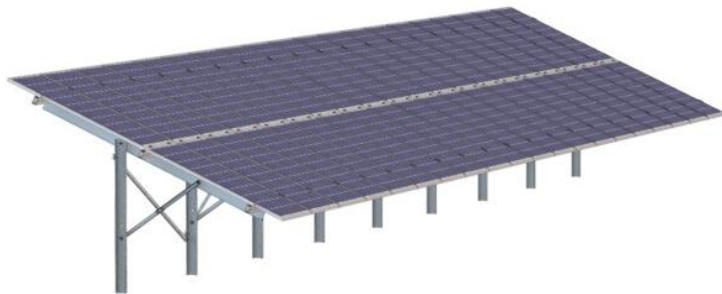

groundmounted

Wide range of applications for all substrates and ambient conditions.
Project-specific design and personal all-round service.

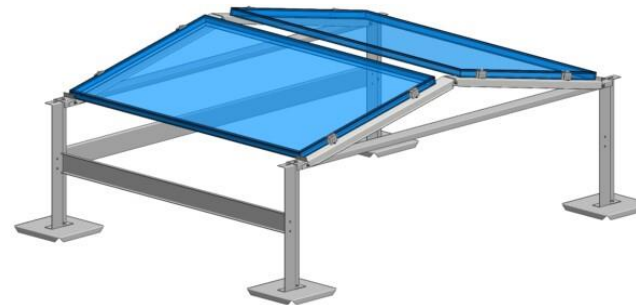

PROFI-Series

The all-rounder.
Rammed mounting system with enormous flexibility

duplex-field

The worse the surface, the more suitable.
Quick & easy installation without heavy equipment.

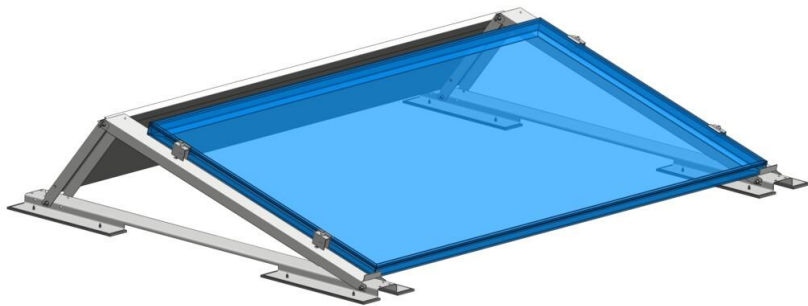

flat roof

Aerodynamic flat roof frames with almost ballast-free structure
Maximum degree of prefabrication and unique ease of assembly

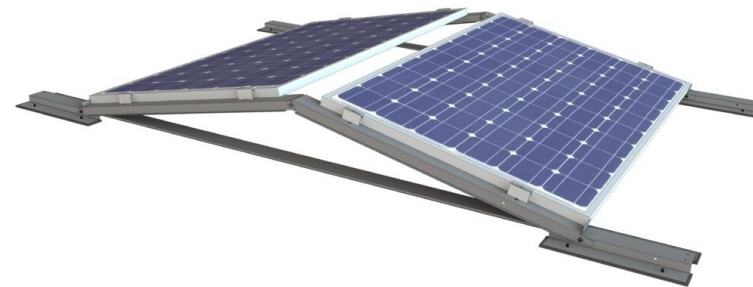

simplex roof

Module elevation with south orientation
Up to 20° product tilt angle

duplex roof

Module elevation with east/west orientation
12° product tilt angle

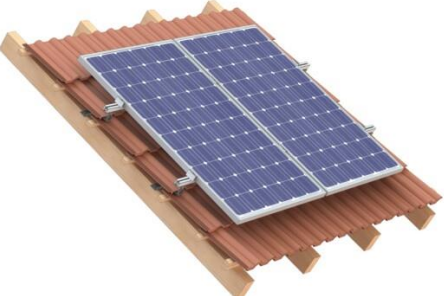

pitched roof

Sophisticated mounting systems for the installation of solar systems on all types of pitched roofs.

with penetration

For tiled roofs, slate roofs, trapezoidal roofs, corrugated sheet metal roofs and eternit roofs

penetration free

Ballastarme und durchdringungsfreie Lösungen für Folien- oder Bitumeneindeckung

energetic results

„We claim that we have seen almost every continent, every underground, every roof and every multilingual project team. This experience pays off when we plan your project prudently, organize flexibly and act decisively in the event of special challenges on site.”

Take a look at an excerpt of our projects that we have been allowed to implement and accompany since 2015.

PROFINAL
MONTAGESYSTEME FÜR SOLARTECHNIK

We care about our planet.
And we want to create a positive impact.

One PV module at the time.
And with a strong trustworthy network of partners.
